1. IPS sizes below IPS 4 per ASTM D3035; IPS sizes IPS 4 and larger per ASTM F714. 2. Pressure Rating (PR) in psi for water at 73°F and will vary for other fluids and temperatures. 3. Calculated Avg ID = Avg OD - (2.12 x min wall), and is for estimating fluid flow. Pipe ID is approximate, not a specification dimension. Contact us for any sizes or ratings not in this publication. The information in this publication does not constitute a guarantee or warranty for piping installations and cannot be guaranteed because of the conditions of use are beyond our control. The User of this information assumes all risk associated with its use. Changes to this publication may occur from time to time without notice.
